Message from the Guest Editors

Spinoza's Theological-Political Treatise first appeared anonymously in 1670. Notwithstanding this benign neglect during the last three centuries, the TTP finally seems to emerge from the shadow of the Ethics. Recent studies of the TTP have focused on the context of the Dutch Republic. The field of the history of humanities has also led to a growing interest in Spinoza's philological scholarship displayed in the TTP. In a stricter philosophical approach of Spinoza's philosophy, scholars zoomed in on the passionate nature of humans and the first form of knowledge, the imagination, opening the way to reassessing positive religion, and attempts were made to link Ethics and the TTP.

This commemorative Special Issue will offer a style guide of the various recent approaches to the TTP and explore new directions, such as the reception of Spinoza in the modern Middle East and the relevance of Spinoza's political philosophy to understanding the role of religion in contemporary European forms of nationalism and authoritarianism.

Message from the Editor-in-Chief

Philosophies searches for the syntheses of philosophical and scientific inquiries. It promotes philosophical work that is derived from the experience of diverse scientific disciplines and cultures. Multiple philosophies already exist – those of logic, information, computation, natural and artificial life, natural or artificial intelligence, complexity, technology, etc. Our mission is not to abandon philosophical roots and traditions of inquiry, but to promote the development of philosophical foundations and effective methodologies derived from diverse scientific explorations, and intended to enhance these explorations as to generate deeper and more holistic knowledge. Innovation may also be achieved through the cultural dimension. Other cultures can offer from their heritage a diversity of resources for exploration; these resources can also contribute to the emergent synthesis of philosophical inquiry.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), PhilPapers, and other databases.

Journal Rank: JCR - Q2 (*History and Philosophy of Science*) / CiteScore - Q1 (Philosophy)
