### Message from the Guest Editor

The role that intellectual virtues play in facilitating knowledge acquisition of all kinds is receiving increasing philosophical attention. This is not only true in virtue ethics and virtue epistemology, but also in other more applied philosophical domains, such as social epistemology, the epistemology of peer disagreement, philosophical psychology, as well as the philosophy of fake news and conspiracy theories. This Special Issue seeks to bring together research from scholars working in these different areas in order to cast new light on the following central questions: What is intellectual virtue? How does it relate to, or differ from, moral virtue? How can the intellectual virtues be inculcated? What role do the intellectual virtues play in epistemic and moral enquiry? Can the intellectual virtues figure in anti-sceptical strategies? What role can intellectual virtues play in countering or preventing the negative social effects of the spreading of fake news and conspiracy theories? Are intellectual virtues central to human development and leading a good life (eudaimonia)? The Special Issue will also examine the nature of ethical and epistemic normativity.

## Message from the Editor-in-Chief

*Philosophies* searches for the syntheses of philosophical and scientific inquiries. It promotes philosophical work that is derived from the experience of diverse scientific disciplines and cultures. Multiple philosophies already exist – those of logic, information, computation, natural and artificial life, natural or artificial intelligence, complexity, technology, etc. Our mission is not to abandon philosophical roots and traditions of inquiry, but to promote the development of philosophical foundations and effective methodologies derived from diverse scientific explorations, and intended to enhance these explorations as to generate deeper and more holistic knowledge. Innovation may also be achieved through the cultural dimension. Other cultures can offer from their heritage a diversity of resources for exploration; these resources can also contribute to the emergent synthesis of philosophical inquiry.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, ESCI (Web of Science), PhilPapers, and other databases.

**Journal Rank:** JCR - Q2 (*History and Philosophy of Science*) / CiteScore - Q1 (Philosophy)
