### Message from the Guest Editors

The goal of this Special Issue is to attract contributions from world-leading experts in the area of PIC in an effort to offer an overview of the field with a particular emphasis on major advances and outstanding challenges. The accepted contributions will include visionary works emphasizing state-of-the-art design, technological breakthroughs, experimental verifications, proof-of-concept demonstrations, and industrial applications.

All papers need to present original, previously unpublished work and will be subject to the normal standards and peer-review processes of the journal. Manuscripts must be prepared according to the usual standards for submission to Photonics and uploaded through the MDPI electronic submission system.
