Message from the Guest Editors

Dear Colleagues,

This Special Issue aims to present original cutting-edge research articles concerning THz and microwave photonics. It covers a wide range of topics related to THz and microwave photonics, including but not limited to:

- Low-noise photonics microwave generation;
- Optical frequency comb and its application in MWP;
- Advanced signal-processing techniques;
- Integrated MWP devices;
- THz device technology and system application;
- Time and frequency transfer;
- MWP sensing technology;
- MWP radar;
- RoF for 5G and beyond;
- Precision measurement with MWP;
- High-power photodiode.
