

Special Issue

Optical Tweezers as Scientific Tools: Applications and Techniques

Message from the Guest Editor

With this Special Issue, we are aiming to reduce the gap between optical tweezer developers and users. The potential topics of this Special Issue include, but are not limited to, the following:

- Any application where particles are trapped or manipulated;
- Applications in biology and medicine;
- Applications in biophysics;
- Applications in ultra-cold atom physics;
- Applications in quantum optics and optomechanics;
- Engineering and industrial uses;
- Measurement techniques that involve or benefit from optical tweezers, including experimental improvements of previous realizations;
- Active and passive approaches to generate optical tweezers;
- Methods to statically or dynamically control their position, shape, intensity, trajectory, polarization, etc.;
- Methods to multiplex the number of beams;
- Open and closed loop approaches to control the beam point spread function;
- Laser beam modes that differ from the Gaussian modes, including their realization and application.

Guest Editor

Dr. Vladislav Gavryusev

Department of Physics and Astronomy, University of Florence, 50019 Sesto Fiorentino, Italy

Deadline for manuscript submissions

closed (31 December 2023)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Nelson Tansu
School of Electrical and Electronic Engineering (EEE), The University of
Adelaide, Adelaide, SA 5005, Australia

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec,
CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Optics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 14.8 days after
submission; acceptance to publication is undertaken in 2.6
days (median values for papers published in this journal in
the first half of 2024).
