Deadline for manuscript  
submissions:

**closed (10 August 2024)**

### Message from the Guest Editor

The questions of grain's nutritional value and technological properties will always be relevant, they will become especially important.

Grain quality is strongly affected by soil, agro-technologies, and environmental factors; it is also influenced by changing meteorological conditions. The application of new-generation varieties, ancient subspecies, adapted agro-technologies, innovative technological processes, and the non-typical use of grain can be linked not only with higher quality but also with the use of a wide range of phytonutrients for health promotion and disease prevention as well as for fostering a healthy diet and using natural components. This Special Issue will cover all the above aspects to highlight the peculiarities and challenges of grain composition, its quality, and its technological properties in various agro-technological measures.

We welcome any high-quality research articles, short communications, opinion papers, and review articles on this topic. If you have any plans, please let us know. You could write to us via email or contact the assistant editor at [juicy.yang@mdpi.com](mailto:juicy.yang@mdpi.com)

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Plants* is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
