Message from the Guest Editors

The journal *Plants* will be publishing a Special Issue “Elemental and Molecular Composition of Food Supplements of Plant Origin” that will focus on quality assessment of over-the-counter supplements of plant origin. According to the European Food Safety Authority (EFSA), food supplements are concentrated sources of nutrients (i.e., mineral and vitamins) and biomolecules with either nutritional or physiological effects that are marketed in “dose” form (e.g., pills, tablets, capsules, liquids in measured doses). These are usually intended to correct nutritional deficiencies but not to treat or prevent diseases in humans nor to modify physiological functions.

Deadline for manuscript submissions:

closed (15 May 2021)

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Dilantha Fernando
Department of Plant Science,
University of Manitoba, Winnipeg,
MB R3T 2N2, Canada

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
