Deadline for manuscript  
submissions:

**closed (20 October 2022)**

### Message from the Guest Editor

Dear Colleagues,

In order to secure a stable rice yield in a variety of global climates, it is important to identify genes related to the genes related to the defense mechanism of rice according to the external and internal reactions of rice. Therefore, this Section is based on the study of related genes screened by QTL and their effect on making the cDNA library more effective than NGS. The Section also aims to accurately list methods related to the morphological investigation of rice for stress and to present a series of molecular biological applications that improve the efficiency of related genetic analysis.

Prof. Dr. Kyung-Min Kim

## Message from the Editor-in-Chief

*Plants* is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
