## Trends in Plant Virus Epidemiology and Control: Opportunities from New or Improved Technologies

Guest Editor:

**Dr. Dirk Janssen**

IFAPA, Sustainable Plant  
Protection, 04745 La Mojonera,  
Almeria, Spain

Deadline for manuscript  
submissions:

**closed (30 September 2023)**

### Message from the Guest Editor

Plant viruses pose a continuous and serious constraint on both the yield and quality of crops worldwide. Plant virus epidemiology studies the rates of temporal and spatial change of viral disease in populations, and determines factors underlying change. High-throughput sequencing-based surveillance approaches can provide information to better understand the impact of plant viruses on crops, supporting the development of more targeted field and lab-based diagnostic tools. This Special Issue of *Plants* will highlight novel techniques and methods used to improve our understanding of plant virus epidemics and to develop better ways to control these viruses.

## Editor-in-Chief

**Prof. Dr. Dilantha Fernando**  
Department of Plant Science,  
University of Manitoba, Winnipeg,  
MB R3T 2N2, Canada

## Message from the Editor-in-Chief

*Plants* is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
