

Recent Trends in Genomics and Transcriptomics of Field Crops

Guest Editors:

Dr. Muhammad Qasim Shahid

Dr. Faheem Shehzad Baloch

Dr. Ephrem Habyarimana

Dr. Muhammad Azhar Nadeem

Message from the Guest Editors

This Special Issue of Plants journal will provide a platform to the scientific and breeding community to share their research and review studies regarding the genomic, transcriptomic and biotechnological aspects of field crops. This Special Issue will cover a wide variety of areas including:

- Germplasm characterization of field crops;
- Genomic and genetic advancement in field crops;
- Identification of genomic regions for trait of interest in field crops;
- Transcriptomics and RNAseq of field crops;
- Gene expression and genome editing of field crops for trait of interest;
- Tissue culture and gene transformation in field crops;
- Genomic prediction and marker-assisted breeding for trait of interest;
- High-throughput phenotyping and big data analysis in field crops.

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
