## Innovative Seed Enhancement Technologies

Guest Editors:

**Dr. Alison Ritchie**

School of Agriculture and Environment, University of Western Australia, Western Australia 6009, Australia

**Dr. Lauren Svejcar**

USDA-ARS, Eastern Oregon Agricultural Research Center, Burns, OR, USA.

Deadline for manuscript submissions:

**closed (15 June 2024)**

### Message from the Guest Editors

Seed enhancement technologies (SETs) are being developed and applied to native plant species increasingly in order to alleviate barriers to plant establishment in ecological restoration. The application of innovative seed enhancement technologies in the restoration industry is still in its infancy, yet it has seen advancements in the agricultural and horticultural sectors. As almost 1 billion hectares of lands have been pledged for restoration globally under the UN Decade of Ecosystem Restoration, effective and successful seed-based restoration is of high importance. The adoption of SETs to meet the restoration targets of the coming decade requires progressive research efforts, knowledge and data sharing, collaboration and improvements to native seed use. Native or wild plant SETs and their application in ecological restoration are rapidly expanding areas of research. This Special Issue aims to provide the latest research on various new tools, developments, approaches and applications of innovative seed enhancement technologies from the perspective of native plant restoration.

## Editor-in-Chief

**Prof. Dr. Dilantha Fernando**  
Department of Plant Science,  
University of Manitoba, Winnipeg,  
MB R3T 2N2, Canada

## Message from the Editor-in-Chief

*Plants* is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
