Deadline for manuscript
submissions:

closed (31 October 2023)

Message from the Guest Editor

Plants and insects make up approximately half of all known species of multicellular organisms. In recent years, insect–plant interactions have received increasing attention from biologists as well as agronomists. Better understanding the factors governing the relationships between insects and plants can be incredibly helpful in unraveling the causes of insect pest development and further create biologically safe control strategies intended to prevent insect pest outbreaks. In this Special Issue, we would like to invite experts to publish research or review articles or minor commentary papers on the topic of “Insect–Plant Interaction”, focusing on agricultural insects and crops.

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Dilantha Fernando
Department of Plant Science,
University of Manitoba, Winnipeg,
MB R3T 2N2, Canada

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
