Biological, Pharmaceutical and
Environmentale Sciences,
University of Messina, Messina,
Italy

Dr. Antonella Smeriglio

Department of Chemical,
Biological, Pharmaceutical and
Environmentale Sciences,
University of Messina, Messina,
Italy

Deadline for manuscript
submissions:

31 March 2025

Message from the Guest Editors

Nowadays, the market for phytotherapeutics as well as plant-based food supplements (PFS) is constantly growing. A more holistic approach to treatments, as well as the need to find new alternatives to conventional therapies which often cause significant side effects and consequent therapeutic inefficiency, has inexorably led research to focus on the plant world. Indeed, it represents an inexhaustible source of plant complexes and isolated bioactive compounds capable of preserving the subject's state of health, as in the case of PFS, or assisting conventional therapy and sometimes even replacing or filling some therapeutic gaps, as in the case of phytotherapeutics.

The aim of this Special Issue is to collect new scientific evidence in this regard. Original research articles and reviews investigating medicinal and aromatic plants through a multidisciplinary approach (macro- and micro-morphological, phytochemical and biological) will be taken into consideration. Particular attention will be given to some critical points regarding the reproducibility of health and therapeutic effects, such as the standardization and titration of plant complexes.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
