

## New Insights into Ethnobotany and Ethnoecology

Guest Editors:

### Dr. Ivana Vitasović Kosić

Department of Agricultural Botany, Division of Horticulture and Landscape Architecture, University of Zagreb Faculty of Agriculture, Svetošimunska cesta 25, HR-10000 Zagreb, Croatia

### Dr. Łukasz Łuczaj

Institute of Biology and Biotechnology, University of Rzeszów, 35-959 Rzeszów, Poland

Deadline for manuscript submissions:

**31 October 2024**

### Message from the Guest Editors

Wild plants and non-cultivated edible mushrooms have always been around us. The influence of climate change on expanding the plant distribution range may change people's eating habits, and climate change also enables the growth of once "exotic alochtoneous" plants and their local application.

This Special Issue seeks to address all contemporary challenges caused by changing environmental conditions, as well as the historical and present cross-border migration of people causing changes in traditional ecology knowledge. The legacies of such relationships are ultimately important for understanding the human history of past and present landscapes.

This Special Issue welcomes research into agroecosystems from different parts of the world and discusses similarities and differences in the use of edible, medicinal, and economic plants across different cultures and segments of society. Articles that contribute to the preservation of the tradition of using local varieties of cultivated plants are encouraged for the purpose of preserving traditional local customs and genetic sources of plant seeds (e.g., practices of use, management, and domestication) in order to increase food supplies.

an Open Access Journal by MDPI

## Editor-in-Chief

**Prof. Dr. Dilantha Fernando**

MB R3T 2N2, Canada

## Message from the Editor-in-Chief

*Plants* is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
