Message from the Guest Editors

Dear Colleagues,

Plant defense responses against viruses and molecular plant–virus interactions have been studied by numerous researchers worldwide in recent decades. It is well known that studies in plant virology have had a profound influence on what we currently know about the general mechanisms governing plant cell biology and physiology.

For the present Special Issue of *Plants*, we invite you to submit research articles, review articles, short notes, and communications related to all the aspects of plant defense responses to viruses. This Special Issue will provide an overview of recent research, including fundamental as well as applied studies, aiming to increase our current knowledge of this fascinating field of research. We look forward to your contribution.

plants

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [PubAg](#), [AGRIS](#), [CAPus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
