## Plant Metal and Metalloid Homeostasis

Guest Editors:

**Prof. Dr. Felipe Klein  
Ricachenevsky**

**Dr. Raul Antonio Sperotto**

**Dr. Gustavo Brunetto**

Deadline for manuscript  
submissions:

**closed (20 March 2023)**

### Message from the Guest Editors

Plants' ionome includes metals and metalloids, some of which are essential for plants growth and development, while others are trace elements which may (or may not) be harmful. Understanding how plants uptake, distribute, accumulate, and regulate the levels of such elements in each organ, tissue, cell, and organelle is a challenge, and to date, little is known about this. Metals and metalloids can also be toxic when accumulated in excess, and some plants can be tolerant. However, our understanding of tolerance is also scarce. Moreover, there are several interactions in which accumulation of one metal can affect the concentration of others, demonstrating that homeostasis of different metals and metalloids in an integrative way is key. In this Special Issue, we are interested in receiving manuscripts focused on metal/metalloid toxicity/deficiency; transport, regulation and distribution; physiological, biochemical, and molecular responses to metals/metalloids; plant biofortification strategies; interactions of metals/metalloids with each other, both in the soil and in the plant; discoveries in model and non-model species; and methods.

## Editor-in-Chief

**Prof. Dr. Dilantha Fernando**  
Department of Plant Science,  
University of Manitoba, Winnipeg,  
MB R3T 2N2, Canada

## Message from the Editor-in-Chief

*Plants* is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
