## Plant Stress Physiology and Molecular Biology—2nd Edition

Guest Editor:

**Dr. Peng Zhou**

School of Agriculture and  
Biology, Shanghai Jiao Tong  
University, Shanghai 200240,  
China

Deadline for manuscript  
submissions:

**20 October 2024**

### Message from the Guest Editor

Plants grow and reproduce in complex environments, and plants are subject to a variety of chemical and physical abiotic stresses, including low temperature, high temperature, drought, salinity, flooding, excess light, ultraviolet radiation, mineral nutrient deficiency, oxygen deficiency, injuries, and air, soil or water pollution such as heavy metals, pesticides, ozone and sulfur dioxide pollution etc. These abiotic stresses can negatively affect plant physiology and biochemistry, and further affect plants growth and development. In order to cope with abiotic stress, plants tolerate, resist or avoid the harm of stress through various mechanisms. Over the past few decades, a variety of novel methods/technologies have been used to study stress damage to plants and plant responses and defense mechanisms to stress. This Special Issue will cover a wide variety of areas, such as the effects of various abiotic stresses on plants, plant stress resistance genes, the regulatory network of stress resistance, and the role of hormones in plant stress resistance. The aim of this Special Issue is to provide an up-to-date understanding of plant responses to abiotic stress.

## Editor-in-Chief

**Prof. Dr. Dilantha Fernando**  
Department of Plant Science,  
University of Manitoba, Winnipeg,  
MB R3T 2N2, Canada

## Message from the Editor-in-Chief

*Plants* is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
