Deadline for manuscript
submissions:

31 October 2024

Message from the Guest Editors

Dear Colleagues,

Plant pathogens can cause huge crop losses with evident economic impacts. To meet these challenges, plant protection represents a key factor in order to develop efficient strategies for disease management. For the success of plant protection it is essential to be one step ahead of these pathogens. This is possible by understanding how these infectious agents interact with their hosts, vectors, other pathogens, and the environment. We must also predict how all these drivers will respond to climate change. The scope of this Special Issue embraces the following research areas and welcomes original research articles and reviews. Research areas may include (but are not limited to) the following:

- Agriculture and food security;
- Public policies/phytosanitary measures for agriculture management;
- Biocontrol and green solutions for pest management;
- Interaction of plant pathogens with abiotic stresses;
- Impact of global climate changes in spreading of plant pathogens;
- Reports on plant diseases.

We look forward to receiving your contributions.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
