Message from the Guest Editors

Dear Colleagues,

Plants contain many principles and some of those principles are beneficial for human health. However, many unclear points remain despite the best efforts of many researchers. Particularly, ethano-herbs and/or classical plants are widely used around the world. Therefore, this Special Issue will focus on these points. Additionally, combinations of plants and/or plant combined modern medicine are also popularly used in therapeutics. It is important to assess the renowned historical significance of products contained in plants. Be free to share useful plants that are applied in your local market, using a reliable model of disorders to indicate the effectiveness in therapeutics. Moreover, considering the high interest in plant-derived effectiveness in health as an emerging challenge for modern therapies, this Special Issue will cover a wide variety of areas, aiming to contribute to the overall knowledge of medicinal plants from several perspectives. Scientific papers, including review, mini-review, commentary, original research, and others, are all welcome from everywhere around the world.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
