## Plants for Extreme and Changing Environments: Domestication, Evolution, Crop Breeding and Genetics

Guest Editors:

**Dr. Freddy Mora-Poblete**

Institute of Biological Sciences,  
University of Talca, 1 Poniente  
1141, Talca 3465548, Chile

**Prof. Dr. Eliemar Campostrini**

Plant Physiology Lab,  
Ecophysiology of Tropical and  
Subtropical Crops, Northern Rio  
de Janeiro State University,  
Campos dos Goytacazes 28013-  
602, RJ, Brazil

Deadline for manuscript  
submissions:  
**closed (30 December 2022)**

### Message from the Guest Editors

Extreme environments present various stressors for plants, including extreme levels of radiation, water availability (drought, floods, and submersion), salinity, temperatures (heat, cold, freezing), chemical factors (metals and pH), and combinations thereof. On the other hand, climate change has many consequences for plants, altering ecosystems around the world, including agricultural production systems, challenging researchers to design adaptation strategies. In general, the abiotic conditions present in extreme and changing environments are the main limiting factors for the development and productivity of crops, as well as for the species distribution in natural plant ecosystems.

This Special Issue aims to explore new insights into domestication processes, evolution, crop breeding, and/or genetics in plants facing diverse challenges from extreme and changing environments. We welcome reviews, perspectives, original research articles, and short communications that focus on advances related to the aforementioned issues.

## Editor-in-Chief

**Prof. Dr. Dilantha Fernando**  
Department of Plant Science,  
University of Manitoba, Winnipeg,  
MB R3T 2N2, Canada

## Message from the Editor-in-Chief

*Plants* is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
