## Plant Volatiles: A Goldmine Not Fully Explored

Guest Editors:

**Dr. Cecilia Cagliero**

Department of Drug Science and Technology, University of Turin, 10125 Torino, Italy

**Prof. Dr. Patrizia Rubiolo**

Department of Drug Science and Technology, University of Turin, 10125 Turin, Italy

**Prof. Dr. Barbara Sgorbini**

Department of Drug Science and Technology, University of Turin, 10125 Turin, Italy

### Message from the Guest Editors

Plant volatiles are low-molecular weight lipophilic compounds derived from different biosynthetic pathways, emitted by the plants mainly to defend themselves against herbivores and pathogens, to attract pollinators and seed dispersers, and as signals involved in plant–plant communication.

Deadline for manuscript submissions:

**closed (31 May 2021)**

University of Manitoba, Winnipeg,  
MB R3T 2N2, Canada

## Message from the Editor-in-Chief

*Plants* is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
