## Weed Management in Rangeland Environments

Guest Editors:

### **Dr. Shane Campbell**

School of Agriculture and Food Science, the University of Queensland, Gatton, QLD 4343, Australia

### **Dr. Tony Grice**

James Cook University, Douglas, Townsville, Queensland, 4811, Australia

Deadline for manuscript submissions:  
**closed (31 May 2021)**

### **Message from the Guest Editors**

This Special Issue of *Plants* aims to capture some of the challenges associated with the management of weeds in rangeland environments and explore the innovative ways being applied to minimize their economic and environmental impacts. While it is recognized that both native and exotic plants can be problematic in rangeland systems, this Special Issue will focus mainly on exotic species. Articles covering the following areas will be considered:

- Causes and driving forces behind weed invasions in rangelands.
- Policies and strategies to more effectively manage rangeland weeds.
- Prioritizing activities to most effectively utilize limited resources.
- Existing and new challenges impacting weed management in rangelands (e.g., climate change, contentious weeds).
- New technologies to control problematic species.
- Innovative new approaches to strategically manage high-priority weed species at different jurisdictional levels (e.g., local, regional, national).

Reviews, Original Research, Methods, Perspectives, and Opinion Articles are all welcome for submission.

# Special Issue

an Open Access Journal by MDPI

## Editor-in-Chief

**Prof. Dr. Dilantha Fernando**  
Department of Plant Science,  
University of Manitoba, Winnipeg,  
MB R3T 2N2, Canada

## Message from the Editor-in-Chief

*Plants* is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
