Message from the Guest Editors

For the occasion of the 10th anniversary of Plants, it is launching a Special Issue named "Young Investigators in Plants". This Special Issue aims to help young plant scientists to exchange knowledge and increase the visibility of their studies with specialists in any molecular aspect of plant sciences. Through this Special Issue, young researchers are expected to lead the publications derived from their research, either as a first or corresponding author, regardless of whether they are in the early stages of their research careers or intermediate stage, as long as they meet the requirement of being under 40 years old. One novelty compared to previous Special Issues is that, along with the publication, the young author must present a personal profile that includes a photograph, the university from which they have graduated, current affiliation, and interests or scientific background. We aim to reinforce the figure of the young investigators, to give them visibility and to raise interest within the plant science community. With this new initiative, we wish to strengthen the networking of young researchers, paving the way to later stages of their research careers.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Dilantha Fernando

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
