

## Special Issue

# Historical Ethnobotany: Interpreting the Old Records

### Message from the Guest Editors

History is the basis for our interpretation of humanity's past. Systematized historical sources allow us to see the practical changes that occurred over centuries of ethnobotany and analyze (although sometimes solely hypothesize on) the causes of such changes. Studying history helps us to understand the influences on the evolution of local ecological knowledge regarding plant use. In ethnobotany, numerous understudied historical sources are awaiting modern interpretations. Old uses enhanced by the new possibilities offered by technology can enrich our everyday life. Yet, understanding historical sources, especially in ethnobotany, where several disciplines are involved, is not univocal. Mistakes introduced by misidentified plants or information misinterpreted from old languages can have negative, long-term consequences. This Special Issue aims to provide examples of the critical analyses of various historical sources, provide insights into ongoing historical and diachronic studies on plant use, and introduce the best practice guidelines for interpreting such data.

### Guest Editors

Dr. Renata Sõukand

Department of Environmental Sciences, Informatics and Statistics, Ca' Foscari University of Venice, Via Torino 155, Mestre, 30172 Venice, Italy

Dr. Raivo Kalle

Estonian Literary Museum, 51003 Tartu, Estonia

### Deadline for manuscript submissions

closed (31 July 2023)

## About the Journal

### Message from the Editor-in-Chief

*Plants* is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, and conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
