Message from the Guest Editors

Dear Colleagues,

In recent times, covalent organic polymers (COPs) have emerged as a central subclass of highly porous and stable materials, which are reported as highly efficient materials in a wide range of applications. However, developing such functional polymer materials still faces great challenges in terms of large-scale production and the understanding of structure–property relationships. Therefore, there is great interest in the development of novel strategies for the design and synthesis of multi-functional COPs, which can expand their applications in various fields.

This Special Issue of *Polymers* will present the current state-of-the-art in the synthesis and applications of COPs. Full research papers, communications, and reviews are all welcome.

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 5.0.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
