Message from the Guest Editors

Dear Colleagues,

In recent decades, natural fibers have gained increasing popularity due to their good characteristics and properties, especially their low density, high specific mechanical strength, low cost and green sources. These fibers can be an ecofriendly solution to substitute or compete with the use of synthetic fibers, and they can also be used to produce more eco-friendly materials.

We aim to increase the development in this field, achieve good mechanical performance, and make new discoveries. New research is needed in various fields, such as characterization, properties, processing and applications. This is particularly the case regarding new composites using new matrixes, new natural fibers or new processing techniques this raw materials.

Thus, in this Special Issue, we will welcome contributions which exploit new composites using natural fibers as reinforcements or fillings.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien
und Polymertechnologie,
University of Potsdam, 14476
Potsdam-Golm, Germany

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 5.0.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
