

Polymer-Based Materials for Batteries and Supercapacitors

Guest Editor:

Prof. Dr. Jeng-Yu Lin

Department of Chemical and
Materials Engineering, Tunghai
University, Taichung 40704,
Taiwan

Deadline for manuscript
submissions:

closed (30 April 2024)

Message from the Guest Editor

Owing to the extensive consumption of limited natural fossil fuels in recent decades, sustainable renewable energy conversion devices as well as energy storage devices have received significant attention. Recently, polymer-based materials have been regarded as excellent candidates as active electrode materials or electrolyte components for electrochemical energy storage applications, including batteries and supercapacitors. Therefore, this Special Issue will discuss synthesizing and designing various polymer-based materials for electrochemical energy storage applications. Contributions, including full-length research articles and review articles, are welcome.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 5.0.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
