Deadline for manuscript  
submissions:

**closed (5 September 2024)**

### Message from the Guest Editors

Dear Colleagues,

In a world constrained by limited resources and an environment impacted by the inadequacies of current waste management practices, there is a strong demand for society to implement circular economy principles.

Using materials bound for waste streams to form new composites with advanced properties is one way of reducing the environmental burden of waste. Recycling or upcycling polymer composites is another.

This Special Issue aims to collect original research and reviews that focus on the development of polymer composites from various waste streams to develop new sustainable materials, as well as methods to upcycle or recycle waste polymer composites.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.9.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
