Message from the Guest Editor

Dear Colleagues,

The development of polymeric coatings has expanded exponentially in material science, chemistry, engineering, and surface engineering during the last century. Nowadays, polymeric coatings, as structural and functional anti-corrosion materials, are widely utilized in industrial and artistic manufacturing due to their economical nature, easy processability and shining appearance. However, there is a particularly urgent need to improve the inhibitory activity and functionality of these coatings because such properties offer relief to the environment and increase the acceptance of plastic products. Fortunately, some research has been conducted in this area in the past decade. The purpose of this section is to coherently collect these studies and present them to a wide industrial and academic community.

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 5.0.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q1 (*Polymer Science*) / CiteScore - Q1 (*Polymers and Plastics*)
