Hungary

Deadline for manuscript
submissions:

closed (25 August 2023)

Message from the Guest Editor

Pure polymeric materials are faced with several problems, including stability and durability issues, and so additives are widely used in polymer production in order to achieve the desired properties. Therefore, the development and research of polymers cannot be separated from additive technologies. Additives can be incorporated into the formulation of the base polymers, thus improving processability, prolonging the lifespan, and enhancing the physical and chemical behaviour of the final product.

The aim of this Special Issue of Polymers, entitled “Additives in Action”, is to cover the most recent progress in the field of polymer additives. This Special Issue will consider green solutions, new applications of synthetic, natural, and bio-additives, as well as the experimental and theoretical characterization of the final products. Both research and review papers are welcome.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 5.0.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
