Dr. Letizia Verdolotti

Institute for Polymers,
Composites and Biomaterials,
National Research Council of
Italy (IPCB-CNR), Portici-Naples,
Italy

Deadline for manuscript
submissions:

closed (15 February 2023)

Message from the Guest Editors

Dear Colleagues,

In view of moving towards a post-petroleum society, with the aim of protecting the environment and preserving its resources for future generations, research has to develop other processes to produce materials, starting from an eco-friendly and sustainable source. Moreover, the integration of better biomass producing and processing sectors to reconcile food security, natural resource scarcity and environmental objectives with the use of biomass for industrial and energy purposes is a highly current and relevant goal. Nowadays, extensive scientific and industrial research is concentrated on the development of advanced new materials and technologies for bio-based products.

The fundamental purpose of this special issue is therefore to collect the most advanced results concerning the synthesis of bio-based composites, as well as those with natural nanofiller polymer materials, with particular reference to the chemistry of the reactions involved and the relationships between the structure of functionalized products and the properties realized in terms of specific required application.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien
und Polymertechnologie,
University of Potsdam, 14476
Potsdam-Golm, Germany

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 5.0.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
