Message from the Guest Editor

Dear Colleagues,

In recent years, polymers and polymeric materials have been gaining attention for application in the fields of cancer therapy and diagnostics. This Special Issue aims to develop the knowledge pertaining to the biomedical application of such polymers/materials from a broad perspective. We are searching for challenging studies that may discuss the design and synthesis of polymers, development and characterization of polymeric materials, elucidation of various in vivo phenomena such as blood circulation and biodistribution profiles, and elucidation of processes involved in cancer therapy and diagnostics. The papers published in this issue do not necessarily need to report novel polymeric materials, but should provide new insights into biomedical applications.

Dr. Yasutaka Anraku

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
