Biological Engineering, Korea
University, Seoul 02841, Korea

Deadline for manuscript
submissions:

closed (31 December 2021)

Message from the Guest Editors

Dear Colleagues,

"Click" chemistry encompasses reactions that are high yielding, fast, modular, and wide in scope. They are practical and tolerant of a variety of functional groups. Finally, product isolation is expected to be effortless due to a lack of by-products. These features are ideal for polymer synthesis and functionalization purposes. Hence, the synergy between the two disciplines has given rise to an area of intense research activity. In this Special Issue we would like to showcase this growing area of research in which "click" chemistry is paving the way to new polymer synthesis methodologies and new polymeric functional materials. As Guest Editors, we invite contributions in the form of original research articles or reviews on this subject.

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 5.0.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
