Deadline for manuscript  
submissions:

**closed (15 April 2023)**

### Message from the Guest Editor

Dear Colleagues,

Currently, electrospinning is the most promising nanotechnology to process most polymers into nanofibers. Additionally, electrospun products are playing an important role in fighting against the COVID-19 pandemic. While many other nanofiber technologies have been developed, electrospinning is still the most accessible approach that researchers in worldwide can apply to design and create so many amazing products, referring to the fields of tissue engineering, public health security, filtration, energy, etc.

This Special Issue focuses on publishing original research papers or reviews on manufacturing new functional polymers into nano- or low micro-fibers using electrospinning or its derivative technologies, such as melt electrowriting, electro-centrifugal spinning, near-field electrospinning, and so on. Of course, hybrid manufacturing that contains electrospinning is also acceptable.

Dr. Huaizhong Xu

## Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 5.0.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
