Deadline for manuscript  
submissions:

**closed (31 May 2025)**

### Message from the Guest Editor

Dear Colleagues,

Advanced natural polymers are widely applied in various engineering fields, including drug delivery, food, and functional materials, which present high biodegradability, good biocompatibility, and external stimuli reacted physiological activity. Therefore, it is of great practical significance and application value to clearly analyze the chemical structure of polymer composites and accurately reveal the structure–activity relationship for the design and development of more functional materials and smart drugs that can be used in various engineering applications, such as biological and environmental fields.

The aim of this Special Issue is to gather the latest original research studies that involve natural polymer materials. We look forward to receiving your manuscripts in this field. Research articles and review articles are both welcome.

Dr. Sung-Min Kang

## Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.9.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
