Computer Science and
Engineering, University of Quebec
at Rimouski, Rimouski, QC,
Canada

Message from the Guest Editors

Laser energy is widely used as a tool for manufacturing in industries and is thus called Laser Materials Processing. Laser welding, laser cutting, laser drilling, laser surface treatments (laser coating, laser hardening, peening, texturing...), laser forming, laser hybrid processes, and laser additive manufacturing are some of the key applications of the laser in industries. Lasers can improve the efficiency, quality, and capabilities of production processes. Laser Materials Processing plays a crucial role in the new manufacturing era. The latest research on laser application in any material in industries, especially polymers, is invited to be published in this Special Issue. State of the art in Laser Materials Processing, recent accomplishments, and the future of laser applications in industries are highly appreciated for publication.

und Polymertechnologie,
University of Potsdam, 14476
Potsdam-Golm, Germany

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 5.0.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
