Message from the Guest Editor

Dear Colleagues,

This Special Issue aims to map the main plastic packaging materials and their global impact. Plastic packaging is present in everyday life. Although it is difficult to visualize a life without plastics, the planet's carbon cycle is under stress by the amount of plastic packaging discarded annually. Among the main packaging materials are plastic packaging made from commodity plastics and biodegradable ones. Replacing non-degradable packages is one solution, but it may not be the only one. There are many answers for the same question. Additionally, there is the challenge of microplastics, one of the main problems related to inappropriately discarded plastic packaging.

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.9.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
