Deadline for manuscript  
submissions:

**closed (31 December 2021)**

### Message from the Guest Editors

The use of polymers as platforms to design new materials for biological and agricultural applications has experienced noticeable growth in the past few decades. The many advantages offered by polymers as compared with other materials can explain this success. Ease of processing, flexibility regarding shape and geometry, and tailorable and modifiable properties are just some of their advantages. Moreover, the increased use of biopolymers has allowed us to overcome limitations related to toxicity, cost, availability, and degradability. These features have motivated researchers in different areas to develop advanced materials with broad applicability, particularly in biomedical and agricultural fields.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 5.0.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
