Message from the Guest Editors

At present, there is a need to treat drinking water and wastewater to an acceptable quality for its use. This can be achieved through various technologies that employ polymer-based materials, such as polymeric adsorbents, composites, polymeric flocculants, polymeric filters, polymeric membranes, and polymeric composites, among others. These materials can be modified or treated to increase their effectiveness in removing pollutants from effluents or to improve their physicochemical or mechanical properties for their use. This Special Issue on “Polymer-Based Materials for Water Purification and Wastewater Treatment” considers research papers with a focus on the use of polymer-based materials used in various drinking water and wastewater treatment technologies.

Deadline for manuscript submissions:

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 5.0.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
