Message from the Guest Editor

Dear Colleagues,

The production of composites with a polymer matrix opens up promising prospects for the development of new implants and endoprostheses, systems with controlled release of pharmacologically active drugs, materials for soft tissue replacement, as well as muscle imitation and determination of metabolite concentrations.

The purpose of this Special Issue is to collect results on the preparation and use of polymer composite materials in medicine and biology, as well as on the synthesis of new promising macromolecules for the pharmaceutical science.

Original and review manuscripts dedicated to the problems of the preparation and application of hydrogels, polymer materials used for production of implants and endoprostheses, macromolecular drugs carriers, as well as biodegradable materials, are welcome. The development of hemocompatible materials and amphiphilic polymers for pharmacological applications, control of the rate of biodegradation of polymers, pharmacokinetics, composites based on biopolymers, imitation of soft tissues and muscles, creation of biosensors are also the subject of this Special Issue.

Dr. Yaroslav O. Mezhuev

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.9.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
