Deadline for manuscript
submissions:

closed (25 February 2024)

Message from the Guest Editor

Dear Colleagues,

Nowadays, polymers are everywhere. Originally, polymers were isolated materials, but since the discovery of acetylene, conductive polymers have attracted great interest. They can be easily processed and modified and are flexible, low-cost and non-toxic. Thus, they represent good substitutes for inorganic materials in low-temperature electronic applications. In this Special Issue, the interest is centered on the design of new molecular polymer structures and the synthesis and various applications of conducting polymers.

This Special Issue, “Conducting Polymer Composites: Design, Synthesis and Applications”, aims to collect original research papers and critical reviews on recent progress in this area.

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.9.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
