submissions:

**closed (10 December 2020)**

### Message from the Guest Editors

Dear Colleagues,

Double network (DN) hydrogels are a unique type of materials with excellent mechanical strength and toughness due to their strong interpenetrating chain entanglement, distinct network structures, and efficient energy dissipation. DN hydrogels have been found to be useful, as the structure-property relationship can be easily adapted and tuned for the respective applications. As such, several groups are actively involved in the design, synthesis, and applications of these materials. This Special Issue is dedicated to highlighting recent developments in the field; hence, we welcome reviews and papers highlighting new structures, mechanisms, simulations, and applications.

Prof. Dr. Ravin Narain

## Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 5.0.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
