### Message from the Guest Editors

Dear Colleagues,

The improvement in the properties and performance of dental materials plays an important role in clinical practice. Polymer composites are used in almost every field of dentistry. Current research focuses on introducing novel materials, comparing their properties, and providing clinical recommendations. Such effort is necessary, as our area concentrates on restoring oral cavity structures. The optimal treatment plan and its introduction always require thoroughly tested materials.

This Special Issue aims to highlight progress in the properties and clinical applications of polymer composites used in dentistry. However, this Special Issue is not limited to the above topics and will consider publishing all studies connected to novel materials and their applications in dentistry.

## Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 5.0.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
