### Message from the Guest Editors

Dear Colleagues,

Polymer composites consisted of a polymer matrix and functional filler, which were more likely to use a bulk form for good mechanical or dielectric property in the past century. However, in recent years, rising demands for film states of polymer composites were emerged because of the development of many other thriving research areas.

Herein, this Special Issue in Polymers focuses on conception, preparation, and application of polymer composite films which aims to display the advances in this field. The scopes are never limited to flexible electronics or septation processes, but also includes developments of polymer composite films due to various and multidisciplinary application. Original research articles, reviews, and short communications are welcomed in this Special Issue.

## Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 5.0.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
