Message from the Guest Editors

Dear Colleagues,

Bioactivated polymers or polymers with biologically active moieties are prominently featured in nanomedicine, as the interplay with biology enables the targeted delivery and controlled release of therapeutics. Though well-established, bioactivated polymers continue to drive innovation in nanomedicine, as the available synthetic tools and our current understanding of complex biology keep expanding. Therefore, this Special Issue aims to highlight recent and new developments regarding their synthesis, physicochemical characteristics, structure–property relationships, and applications, in addition to perspectives on the further development of the field.

Dr. Sabina Quader

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.9.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
