### Message from the Guest Editor

Dear Colleagues,

In recent decades, natural polymers have become increasingly important for both the scientific and industrial sectors. Cellulose is the first most abundant biopolymer produced on Earth, possessing numerous advanced applications due to its renewable nature, unique properties, and wide availability.

The goal of the present Special Issue in *Polymers* is to share the latest significant aspects related to cellulose and cellulose-based composites, as well as to identify the latest trends in this field for applications in the near future.

Dr. Iuliana Spiridon

*Guest Editor*

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 5.0.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
