### Message from the Guest Editors

This issue is a continuation of the previous successful Special Issue “Cellulose and Renewable Materials”.

Lignin and cellulose are prominent renewable and sustainable resources whose processing into novel materials has been a very appealing research field for many years. This is reflected in both applications—earlier and novel—and new scientific questions. These abundant natural resources already occupy a leading place regarding the bulk use of renewable feedstock, offering a wide variety of properties and applications that are hardly matched by any other natural or synthetic compound. This Special Issue attempts to connect a state-of-the-art fundamental understanding of different molecular aspects with novel cellulose and/or lignin-based applications and renewable materials.

Deadline for manuscript submissions:

**closed (30 September 2022)**

an Open Access Journal by MDPI

## Editor-in-Chief

## Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 5.0.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
