Message from the Guest Editor

Dear Colleagues,

This Special Issue “Polymer Composites for Electro-Optical and Energy Applications” covers the synthesis, characterization, and electro-optical properties of various polymer composites for optoelectronic, energy conversion, and energy storage applications. For example, the composites for stress and pressure sensors, polymer-composite-based triboelectric nano-generation, polymers for electrochromic devices, polymer electroluminescence diodes, conducting polymers for dye-sensitized solar cells, low-bandgap-conjugated polymers for polymer solar cells, polymer composites for perovskite solar cells, polymers for organic thin film transistors, and polymer composites for supercapacitors. The topics may also include the polymer composites for fuel cells and lithium battery. Both reviews and regular original papers are welcome.

Prof. Dr. Rong-Ho Lee

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 5.0.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
