Deadline for manuscript
submissions:

closed (20 May 2022)

Message from the Guest Editor

Modern technology needs advanced energy storage devices for a wide range of applications. Therefore, newly developed energy storage materials are currently the point of discussion. Both supercapacitors and lithium/sodium-ion batteries have paved the way for a revolution in the energy storage field, in collaboration with efficient and effective energy storage technologies.

This Special Issue aims to collect current investigations on electrochemical energy storage applications (supercapacitors and lithium/sodium-ion batteries), mainly focusing on metal oxide-, chalcogenide- and carbon-based electrodes. In addition, comprehensive review articles exploring the trends and progresses of various electro-active materials for electrochemical applications from leading researchers are also welcomed.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.9.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
