Deadline for manuscript  
submissions:

**closed (30 November 2021)**

### Message from the Guest Editor

Over the last decade, non-destructive techniques (NDT) dedicated to the understanding of polymer physics has become of peculiar interest due to the improvement of computational and automation methods and of the resolution of the testing methods. These techniques allow to measure characteristic times of fundamental phenomena in polymers (molecular motion, phase transitions, etc.) and provide access to their spatial heterogeneities by implementing cartographies at microstructural scale.

The special issue aims to collect some manuscripts about one or several non-destructive techniques, providing insight into structure-property relationship. Moreover, numerical simulation and modeling (physically based modeling, molecular dynamics) to complement experimental characterization will also be of interest. Overall, this special issue will serve to improve the fundamental understanding of several phenomena in polymer systems (shape memory, phase changes, crack propagation, plastic mechanisms) that is of significance in a wide range of applications (fatigue life of polymers, energy storage in polymer structures, polymer recycling, etc.).

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 5.0.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
